

# Hartford Gay and Lesbian Health Collective

## WHY GAY HEALTH IN GAY HANDS IS IMPORTANT

Did You Know That Syphilis Rates Among Gay Men in Connecticut Has Increased Since 2005?

That Gay Men Continue to Contract HIV in Connecticut, Particularly Among Young Gay Men?

Gay Health is literally in gay hands. You have the knowledge to stop the spread of sexually transmitted diseases. If you don't have the knowledge, contact us. We're here to help. We at the **Hartford Gay & Lesbian Health Collective** have been long time leaders in STD education, testing and treatment. If you would like more information, contact Donna Shubrooks, RN at (860)278-4163 x13 or [donnas@hglhc.org](mailto:donnas@hglhc.org). Together we can work to bring about a decrease in STD and HIV rates in our community.
