FIGHT THE EPIDEMIC!

KNOW NOW!

FIND out what your status is in just 20 minutes! Knowing your own and your partner's status can help you make good, even better or truly the best choices around preventing the transmission of HIV.

Manage your risks with the help of our trained counselors who can listen, inform and guide you, respectfully and without judging, towards optimum safety in your situation.

Knowing your status makes you much more likely to protect yourself and your partners and may help reduce the incidence of new infections.

The Oraquick Advance Rapid Test is the only FDA approved rapid test available that can screen for both HIV1 and HIV2. It is the most comprehensive test available and we are committed to making the test available to all in our community.

Testing is available most days and, of course, at our Thursday Evening Clinic—please call us for availability of appointments. Because of the syphilis epidemic we are encouraging further testing for STD's for anyone potentially at risk.

Call: (860) 278 4163 to arrange an appointment
